PROFILE

Software and Systems Engineer specializing in **distributed systems, networking, and AI infrastructure**. 7+ years of experience designing high-performance data processing systems across research and industry environments. Experience collaborating with organizations such as **Cisco Systems, Nokia Bell Labs, and Dolphin Interconnect Solutions**. Strong background in **Linux systems, networking, and scalable computing platforms**.

PROFESSIONAL EXPERIENCE

- **Arctic University of Norway (UiT)** Tromsø, Norway
Research Engineer May. 2023 – Apr. 2025
 - Designed and implemented an AI-driven framework that improved edge device energy efficiency by 4×, enabling more efficient distributed inference.
- **Simula Lab** Oslo, Norway
Research Engineer March. 2021 – Dec. 2023
 - Developed in-network computing solutions to accelerate distributed data processing for applications including e-commerce analytics and smart grid monitoring.
- **Cisco Systems** Paris, France
Senior Software engineer Jan. 2019 – Jan. 2020
 - Designed and implemented control and management plane solutions for cloud-native environments using C, Docker, Grafana, and Linux networking.

SELECTED PROJECTS

- **Horizon Europe MISO project**
 - Developed an intelligent framework that reduce energy consumption of end node up to 4 times.
 - Formulated work package ideas under our responsibility for project execution.
 - Participated in all steering, review, and technical meetings.
 - Delivered project deliverables and reports on time.
- **Linux Foundation hICN Project**
 - Designed and implemented models for software switch (i.e., VPP) to interface with network controllers, enabling remote telemetry and configuration capabilities.
 - Project demonstrated in Cisco Live.

PRACTICAL TRAINED COURSES

Supervised Machine Learning (Regression and Classification): build machine learning models in Python using popular machine learning libraries NumPy & scikit-learn

LPI (Linux Professional Institute): vendor-independent professional certification for Linux system administrators and programmers.

MCSA (Microsoft Certified System Administrator): a certification of the ability to configure or manage a windows server infrastructure or desktops and devices in an organization.

CCNA (Cisco Certified Network Associate): a certification of the ability to install, configure, operate, and troubleshoot medium-size routed and switched network.

TECHNICAL SKILLS

Programming Languages

C/C++ Python Bash

Operating Systems

Linux (Ubuntu,CentOS) Windows

Distributed Systems

POSIX Threads OpenMP MPI

DevOps / Automation

CI/CD GitHub Actions

Monitoring

YANG sFlow Grafana

Networking

Ethernet InfiniBand RoCE

Data Storage

MySQL Memcached Redis

Machine Learning

PyTorch STM32CubeAI In-network AI

Version Control

Git Gerrit

Containerization

Docker Kubernetes

EDUCATION

- **Politecnico di Torino** Torino, Italy
PhD in computer engineering Nov. 2015 – Sept. 2019
 - Thesis
 - * High Performance Computing using InfiniBand based clusters
 - **GPA: Graduated with distinction.**
- **Politecnico di Torino** Torino, Italy
MS in communications and computer networks engineering Oct. 2012 – Oct. 2015
 - Thesis
 - * Read-copy update synchronization technique improvement by hardware message passing
 - Research project at École Polytechnique Fédérale de Lausanne (EPFL)
 - **GPA: $\approx 3.93/4$**

ACHIEVEMENTS

- Founder of COM4AI, a community focused on AI and communication systems.
- Pioneered memory storage over modern PCIe interconnect in HPC infrastructure.
- Developed a holistic fall prediction and detection system as part of the OPLON project.
- Best PhD dissertation award at Politecnico di Torino.
- Distinguished provincial mathematical prize 2000.

LANGUAGE SKILLS

- Norwegian, Intermediate, **B1 (Norskprøven)**
- Italian, Upper Intermediate, **B2**
- English, **Fluent**
- Persian, **Native**
